

Thanks so much for purchasing one of our Big Bubba horns!

Components and Installation Instructions

General Information: This horn is controlled by using a momentary horn button or with a toggle switch. (button is included)

(NOTE: Our horns are NOT waterproof, so be sure to mount it in a dry location)

You can wrap your horn in a plastic bag after it is mounted under the hood or other location to help keep it dry and out of direct water contact. The sound will go through the thin plastic bag without any noticeable decrease in sound volume.

Your vehicle must have a 12 volt power source to hook up this horn unit.

Check out our videos explaining exactly how this horn unit functions and how to hook it up.

TIP: Read through entire instructions carefully before beginning the installation process.

Boom Blasters Components

1. Boom Blasters USB Horn Unit
2. Momentary Button
3. USB Cable
4. Instructions

Tools - Parts Needed (not provided):

1. Pliers
2. Wrench or suitable tool to connect power wires to battery
3. Bolts & nuts to mount it down.
4. A few tie downs straps to safely secure the wiring.
5. Windows Computer w/USB port (To upload your preferred sound file)
6. You may require additional wiring depending on where you mount your unit and your button location.

Installation should take around 45 to 60 minutes.

Connecting & Upload Your Sound Files

Our BIG BUBBA horn unit is unique because you can simply upload your own sound file via your computer USB port.

Simply hook up the horn unit via the supplied USB cable to your Windows computer, upload the sound file that you want to play, and then hook it up to your vehicle and your ready to go.

We do NOT supply sound files for you to download to your car horn, this unit was sold to you with that understanding...therefore we do not offer technical support for searching, finding and editing sound files for you to install on your horn...

Connecting The USB Horn To Your Windows Computer

1. Big Bubba can only connect and read files on "WINDOWS" computer systems. (NOT MACS)
2. Hook up your horn unit via the supplied USB cable to your Windows computer...our horn unit works just like a removable thumb drive. (if you know how to use a portable thumb drive, then this will be super easy for you to do)
3. After a few seconds you will see a popup box asking you to open the folder or you can simply navigate to "My Computer" and manually open up the drive to access the internal memory of the horn unit.
4. You will then see a sample sound file in that folder, you will need to delete that file and upload your own sound file.
5. Our Big Bubba USB horn units ONLY accept MP3 sound file and cannot be any larger than 2 megabytes in size (most sound files are very small anyways, so you should have no worries about file size)
6. After downloading your new sound file to your Big Bubba USB horn unit all you need to do now is go test it and then hook it up to your vehicle.

Remember our horns are NOT waterproof, so be sure to mount it in a dry location and mount it away from any moving parts.

You can wrap your horn in a plastic bag after it is mounted under the hood or other location to help keep it dry and out of direct water contact. The sound will go through the thin plastic bag without any noticeable decrease in sound volume.

If you are having troubles understanding the above procedures, then please refer to the tutorial videos that are right here for you to watch!

Caution! Caution! Caution! Caution! Caution! Caution! Caution!

1. Do not install this Unit while the vehicle is running!
2. When the Unit is installed, ensure the wiring harness power lead wires are attached to the battery correctly. Red to Red (Positive), Black to Black (Negative).
3. Secure the Unit properly and ensure the Unit and all wiring are clear of any moving parts (i.e. fan belts, etc.) or items that can cause damage to the Unit.

Boom Blasters Installation Instructions

NOTE: If you do not feel comfortable installing the Boom Blasters Horn Unit, seek qualified professional assistance.

Step 1: Battery Connection

- a. Install the Boom Blasters Unit in the engine compartment close to the battery and away from any moving parts or areas that may cause damage to the Unit or the vehicle. **(The wiring harness red and black wire needs to be able to reach and connect to the battery.)**
- b. Connect the black wire from the wiring harness to the negative (-) side of the battery.
- c. Connect the red wire from the wiring harness to the positive (+) side of the battery.

Note:

- 1) **Ensure all connections are tightened properly!**
- 2) **Route wires neatly away from any moving parts to prevent damage.**

Step 2: Speaker Installation

Install the speaker in a convenient location, but ensure the speaker wires will reach the Unit.

Note: Route the speaker wire neatly away from any moving parts to prevent damage. The sound volume of the Unit may vary depending on the placement of the speaker.

Remember our horns are NOT waterproof, so be sure to mount it in a dry location.

Testing Boom Blasters Unit

1. Touch the yellow wire once (1 time) to the positive (+) post on the battery to the test unit.
2. The Unit will then activate and play.

That's it! now go and hook up your horn.

Check out our video explaining exactly how this horn unit functions and how to hook it up.
