---

**Caution! Caution! Caution! Caution! Caution! Caution! Caution!**

---

1. Do not install this unit while the vehicle is running!
2. When the unit is installed, ensure the wiring harness power lead wires are attached to a good known power source...to either the battery or a convenient fuse block. Red to Red (Positive), Black to Black (Negative).
3. Secure the unit properly and ensure the unit and all wiring are clear of any moving parts (i.e. fan belts, etc.) or items that can cause damage to the unit.

**Telolet Klaxon Horn Kit Installation Instructions**

---

**NOTE: If you do not feel comfortable installing the Horn Kit, please seek qualified professional assistance.**

**Step 1: Battery Connection**

- a. Install the CPU receiver unit somewhere in your vehicle and away from any moving parts or areas that may cause damage to the horn kit or the vehicle. **(The wiring harness red and black wires needs to be able to reach a good power and ground source.)**
- b. Connect the black wire from the wiring harness to the negative (-) side of the battery.
- c. Connect the red wire from the wiring harness to the positive (+) side of the battery.

**Note:**

- 1) **Ensure all connections are tightened properly!**
- 2) **Route wires neatly away from any moving parts to prevent damage.**

**Step 2: Speaker Installation**

Install the speaker(s) in a convenient location, but ensure the speaker wires will reach the unit.

**Note: Route the speaker wires neatly away from any moving parts to prevent damage.** The sound volume of the unit may vary depending on the placement of the speaker(s).

**Be sure to mount your CPU unit in a dry location.**

That's it! now go and hook up your horn kit.

If you are having troubles understanding the above procedures, then please refer to the tutorial videos that are right here for you to watch!

<https://www.boomblasters.com/tutorials/>

**Remember...be sure to mount it in a dry location and mount it away from any moving parts.**

Enjoy your Boom Blasters "Telolet Horn Kit!"
